FindIt bluetooth key finder
User manual

It is recommended to read this user manual carefully and keep it for future reference.

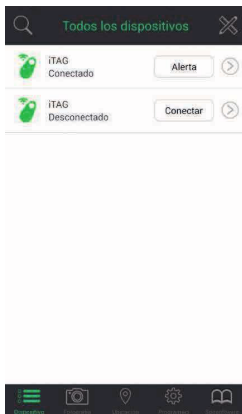

1. Download and install the app "isearching"
2. Turn on the Bluetooth on your mobile phone and open the application.
3. Switch on the iTag.

Switch on/off

Switch on: Press and hold the button on iTag for 3 seconds until you hear it Beep twice.

Switch off: Press and hold the button on iTag for 3 seconds until you hear the long "Beep" sound.

4. Press the button " 🔍 " to find connectable iTag devices.
5. Press the "Connect" button to pair with the desired devices.

Note: You can connect more than one device at once.

6. Press the button ">" to turn to the submenu.

7. Slide the device you want to delete to the left and press the red remove button.

Setting for alert

1. Press the "Alert" button to activate the iTag alarm and press again to stop.

2. Double click the button on iTag to activate the alert on the mobile phone and press the red flashing button to stop.

Note: It depends on the chosen option on settings “⚙”.

Shutter function

1. Press the button "📷" to turn to camera mode.

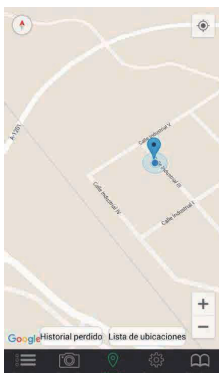

2. Press the button on iTag once to take the picture. Note: This function depends on the configuration of your mobile phone.

Location function

1. To create and save a location, press the button on iTag once. If it has been created successfully, a notification will appear on the bottom of the screen.

Note: The location of your mobile phone must be turned on.

2. To see that location, press "Location list" and then the desired location. You will be directed to "Google Maps" or "Baidu Maps" depending on the chosen map on settings “⚙”.

Note: For any future updates the APP functions maybe affected.

3. If the iTag is lost, the location will be recorded automatically.
Just press the "lost history" button to find the record.
Note: When the connection is lost, the iTag starts beeping and your device will also alert.
4. To delete the list, just slide it to the left and press the red delete button.

Voice recording function

1. Press settings and on "double click setting"; select the voice recording option.
2. Press the button on iTag twice to start recording and twice to stop.
3. The recorded voice will be stored on record list.
